

Monarch Air

A lot of thought has gone into this amazing, feather-light scooter. Though “lightness” was a design priority, we refused to compromise on build quality. That’s why the MONARCH AIR is made from super-strong magnesium alloy.

Putting YOUR Safety First

Three-wheelers might be light, but they are very unforgiving on corners (even at low speeds). Four wheels, on the other hand, are far more reassuring! The MONARCH AIR not only feels safe to operate, it offers the perfect driving position thanks to an adjustable tiller guarantees.

Premium build quality

Lightweight

8” PU wheels, solid front and back

Maximum weight capacity 125kg

120W brushless motor

Maximum speed 4mph

Weighs only 14.75Kg (excluding battery & seat cushion)

10Ah battery included

7.5 Mile Range

Off Board Charging Facility

Magnesium Alloy Frame and Wheels
